PVC BLOWTHROUGH VALVE

(PVCG/BOV)

When pipe is installed in a manufacturing environment, dust and debris can build up in the pipe run which reduces the
airflow and effectiveness of the detector.

The Blow through valve is used to facilitate the clearing of dust and debris built up in a pipe run using low pressure compressed air.

Suitable for installation in temperature
ranges of -40° to +70°
.
Available in 25mm and 27mm.

Installation Instructions

Use the correct solvent Plusbond 3019
Do not paint
Keep pipe clean and free from dust
Do not install in direct sunlight
Only install with approved pipe
Do not use solvents to clean
Only soapy water

Part No	**PVCG/BOV**
Pipe Colour	**Red**
Diameter Tolerance	**+/- 0.15mm**
